## DETAILED ACTION

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

**Claims 12-22 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6707665.**

Although the conflicting claims are not identical, they are not patentably distinct from each other because although the hook member as claimed in claim 12 of the instant application does not recite the manner in which the at least one engaging end extends through the slots when the first housing is positioned, that feature of the claimed invention is obvious in view of the manner in which the first and second engaging ends extends through the first and upper slots as recited in independent claim 1 of the patent. The same is applicable to independent claim 17 of the instant application as it relates to claim 6 of the patent, as well as, independent claim 22 of the instant application as it relates to independent claim 11 of the patent. Furthermore, the hook controlling member

and the manner in which it mounted in the housing as recited in independent claims 12,17,and 22, of the instant application are obvious over independent claims 1,6,and 11 of the patent for the same reasons as stated above.
